

PRACTICE MATERIAL FOR SPELLATHON

(GRADE 5)

1. Create a Travel Destination Website

- **Objective:** Design a webpage that highlights a favorite travel destination.
- **Tasks:**
 - Use HTML to create sections for "Attractions," "Food," and "Culture."
 - Style the page with CSS to add colors and fonts.
 - Include images and links to external resources (like videos).

2. Build a Book Review Page

- **Objective:** Create a website to review and recommend books.
- **Tasks:**
 - Create a multi-page site using WordPress or HTML for different genres (e.g., Fiction, Non-Fiction).
 - Use Bootstrap to ensure it looks good on different devices.
 - Add a simple form using HTML for visitors to submit their own reviews.

3. Design a Nature Awareness Website

- **Objective:** Develop a site focused on a specific environmental issue (like recycling or conservation).
- **Tasks:**
 - Use HTML to create informational sections about the issue.
 - Implement a parallax effect using CSS to make the page engaging.
 - Add a JavaScript-based quiz at the end to test visitors' knowledge.

4. Create a School Project Showcase

- **Objective:** Showcase different school projects with descriptions and images.
- **Tasks:**
 - Build a gallery layout using HTML and Bootstrap.
 - Each project should have its own section with an image and brief description.
 - Use CSS for styling and hover effects to make it interactive.

5. Develop a Fun Interactive Game Page

- **Objective:** Create a simple game or quiz on a subject of interest (e.g., math, history).
- **Tasks:**
 - Use HTML to layout the game interface.

- Add JavaScript to create game logic (like scorekeeping).
- Style the page with CSS and include animations for added fun.
